INSTRUCTIONS

1. Using either NCR paper or the tissue transfer technique, apply your cheetahs onto your plate.
2. Use a small and/or detail brush to apply 3 layers of Banana Boat to your cheetahs.
3. While the cheetahs are drying, you can make your doodles on the background.
We thinned down the Licorice paint slightly with water to make it flow better. We used about 25% water to 75% paint. If you'd like to plan out your doodles you can use a water based marker and it will burn out in the firing process.
4. Finally, use your detail brush to add the details to your cheetahs using 1 coat of Licorice paint.

TIPS

- When tracing on your patterns, press firmly to help with an even transfer.
- Just one coat of paint is necessary on the doodles.
